

Coordinated European Animal Welfare Network (EUWelNet)

1. Presentations made during session 1,

[Introduction David Prichard](#)

[Intro and WP1 Harry Blokhuis](#)

[Role and operation David Prichard](#)

[Denis Simonin, European Commission](#)

[WP2 Bettina Bock](#)

[WP3 Xavier Manteca](#)

[WP4 Isabelle Veissier](#)

[WP3:2 David Main, electronic voting](#)

2. Presentations made the task group leaders at small groups during session 2, and Presentations made by rapporteurs during feedback session 3

Task 2.1 Group 1. Identify difficulties/bottlenecks in implementing EU legislation on animal welfare. Mapping of the implementation process and procedures, identification of main difficulties and of the level of implementation achieved.

[Group presentation](#)

[Plenary presentation](#)

Task 2.2 Group 6. Identify difficulties/bottlenecks in implementing EU legislation on animal welfare. Identification of bottlenecks and likely remedial measures, focusing on knowledge transfer strategies.

[Group presentation](#)

[Plenary presentation](#)

Task 3.1 Group 7. Develop and evaluate knowledge transfer strategies (e.g. training) to ensure consistent identification of broiler farms with poor welfare, facilitate compliance with legislation and improve welfare in relation to broiler Directive 2007/43/

[Group and plenary presentation](#)

Task 3.2 Group 3. Development of an e-learning programme to facilitate compliance with the environmental enrichment and tail docking requirements for finishing pigs

[Group presentation](#)

[Plenary presentation](#)

Task 3.3 Group 8. Developing and testing a knowledge transfer program designed to assist pig producers to make the changes required to house pregnant sows in groups.

[Group presentation](#)

[Plenary presentation](#)

Task 3.4 Group 4. Setting up a technical network of experts to develop and improve standard operation procedures to implement welfare requirements at slaughter (of poultry, pigs, cattle and sheep)

[Group and plenary presentation](#)

Task 4.1 Group 5. Overarching analysis and recommendations on feasibility and conditions. Identification of major 'animal welfare players', their links and their level of interest in a coordinated European animal welfare network

[Group and plenary presentation](#)

Task 4.2 Group 2. Construction and cost/benefit analysis of scenarios for a coordinated European animal welfare network cost benefit

[Group presentation](#)

[Plenary presentation](#)

Task 4.4 Group 9. Determination of the effectiveness of knowledge strategies to overcome specific bottlenecks hampering implementation of EU legislation on animal welfare.

[Group and plenary presentation](#)

Task 4.5 Group 10. Overarching analysis and recommendations on feasibility and conditions. Collation of results leading to concrete recommendations on the conditions under which a coordinated European animal welfare network could be established.
